

ES&H Operations Committee

The structure and function of ATAP's safety organization is illustrated below. The ATAP ES&H Operations Committee consists of the ATAP **Division Deputy for Operations**, **ES&H Coordinator**, and **Program ES&H Coordinators**. The EHS Liaison, EHS Health and Safety Representative, and representatives for matrixed personnel also participate. The EHS Liaison provides technical support to ATAP operations and coordinates requests for additional EHS services. The ES&H Operations Committee discusses ES&H concerns of the programs and projects, lessons learned from them, and information on lab-wide ES&H issues. The Safety Advisory Committee Representative, Radiation Safety Committee Representative, and Laser Safety Committee Representative act as liaisons between the ES&H Operations Committee and the LBNL Safety Committees.
